EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes

and/or additions be unacceptable to applicant, an amendment may be filed as provided

by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be

submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview

with Ting-Mao Chao on 11/21/2005.

2. The application has been amended as follows:

2. (Currently Amended) A method according to claim 1, wherein the signal-to-

noise ratio for the pilot channel is added to the adjustment to obtain the signal-to-noise

ratio for the forward traffic channel.

13. (Currently Amended) An apparatus according to claim 12, wherein the

signal-to-noise ratio for the pilot channel is added to the adjustment to obtain the signal-

to-noise ratio for the forward traffic channel.

Examiner's Statement of Reasons for Allowance

3. Claims 1-22 are allowed.

4. The following is an examiner's statement of reasons for allowance:

Page 2

Applicant's invention is drawn to a method of estimating the signal-to-noise ratio (SNR) of the forward traffic channel in a wireless communication system by estimating the SNR of the pilot channel, calculating and applying an adjustment to convert the estimated SNR of the pilot channel to the estimated SNR of the forward traffic channel, wherein the adjustment comprises two separate components (one component that is updated every 1.25 ms (fast) and one component that is updated every 20 ms (slow)) that are utilized together, not separately.

Applicant's independent claims 1 & 12 recite, *inter alia*, a method and apparatus for estimating the signal-to-noise ratio (SNR) of the forward traffic channel that uses the pilot channel of a wireless communication system by estimating the SNR for the pilot channel, estimating and applying an adjustment to convert the SNR of the pilot channel to a SNR for the forward traffic channel, where the adjustment is formed by a fast correction component and a slow correction component, so that the fast and slow components are utilized jointly, not separately, when the adjustment is applied. Applicant's independent claims 1 & 12 comprise a particular combination, which is neither taught nor suggested by the prior art.

Accordingly, Applicant's claims are allowed for these reasons and for the reasons recited by the Applicant in the amendments filed on 2/2/2005, 9/12/2005 and the interview summary of 8/24/2005.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
